Service Advisor Academy Training 103

website: chriscollinstraining.ca/services

Overview

In the third part of our proprietary Service Advisor Academy series, we take relationship-building practices to the next level by focusing on the neurolinguistic elements of customer interaction. Students will become masters in the step-by-step service system they learned and began to apply in 101 and 102.

In Service Advisor Academy 103, advisors will get in-depth, insider strategies, including neuro-linguistics for sales conversations and self-disciplinary tips from 'Top Dogs' across industries. Case studies and scenarios will be examined using the '*Pet the Dog*' Customer Service Platform introduced in our 102 course – this time, with an emphasis on neurolinguistics and disciplinary processes relating to automotive dealership operation. This 103 course focuses on the so-called 'fine-tuning' of the Advisor's responsibilities and daily activities, to aid both individual and departmental growth, as well as growth of the dealership as a cohesive unit.

Advisors will take *complete charge* of their results, both in the workplace and with their customers and prospects. Modules covered in courses 101 and 102 are mandatory pre-requisites for this mastery course.

Your personal Chris Collins, Inc. instructor will schedule two weeks of in-dealership training for the service/parts department staff. Employees will get hands-on modifications and material resources, including a report of the team's progress towards their goals.

See Pages 2 and 3 for Curriculum Outline, Pricing and other details.

PART 2 – Case Studies, Scenarios, and Applications

We collaboratively examine case studies and scenarios – our instructors provide 5-10 scenarios, each with a different 'focus' and 'problem' to solve. We then welcome students to introduce their own challenging case studies and unpack them in a classroom setting to encourage group learning and mutual feedback. Topics include:
